

**Supplementary Table 2.** Pearson correlation analysis with segmental and total fused subsidence for zero profile cages only

Variable	Pearson r	p-value
Segmental subsidence (n = 5)		
Segmental lordosis change	0.573	0.311
C2-7 lordosis change	0.142	0.820
cSVA change	-0.279	0.650
Total fused lordosis change	0.327	0.591
Total fused subsidence (n = 3)		
C2-7 lordosis change	0.999	0.033
cSVA change	0.374	0.756
Total fused lordosis change	0.149	0.905

cSVA, cervical sagittal vertical alignment.
